USDA SURVEYING SHEEP AND GOAT OPERATIONS

LAKEWOOD, Colo. – December 6, 2018 – The U.S. Department of Agriculture’s (USDA) National Agricultural Statistics Service (NASS) will measure sheep and goat inventories, including lambs and kids, as well as wool and mohair production utilizing the nationwide Sheep and Goat Survey starting in December 2018.

“Interest in sheep and goat data continues to grow with increased diversification in agriculture and consumer demands,” said Bill Meyer, Director, Mountain Regional Field Office. “The Sheep and Goat Survey gives producers the opportunity to report the latest information on conditions and trends in the industry.”

Beginning in late December, operators surveyed will be asked to provide detailed information about their sheep and goat inventories, counts of lambs and kids born during 2018, plus production and prices received for wool and mohair.

“Accurate data on sheep and goat production is a critical decision-making tool for USDA and the industry and enables them to be more responsive to domestic and international markets and consumer needs,” stated Meyer. “The information can also help create public appreciation for the many benefits of U.S. sheep and goats and their products.”

To make it as easy as possible for producers to participate in the survey, NASS offers the option of responding via the Internet, telephone, mail, or a personal interview with a local NASS representative.

As is the case with all NASS surveys, information provided by respondents is confidential by law. NASS safeguards the privacy of all responses and publishes results in aggregate form only, ensuring that no individual producer or operation can be identified.

NASS will publish the survey results January 31, 2019, in the *Sheep and Goats* report. This and all NASS reports are available online at www.nass.usda.gov/publications. For more information, call the NASS Mountain Regional Field Office at (800) 392-3202.
